

LEADING EPC SERVICE AND TECHNOLOGY PROVIDER IN

ENERGY & CHEMICAL INDUSTRIES Better Technology, Better Future

Wison Engineering Ltd.

2012, the company specializes in oil & gas processing, petrochemicals, C1 chemicals, new energy, and other sectors. Wison offers full lifecycle solutions spanning consulting and planning, engineering, procurement,

Overview

To date, the company has successfully executed more than 900 large-scale projects across over 30 countries in Asia, the Middle East, Europe, North America, and South America. Through collaboration with our alliance partners, we endeavor to integrate innovative technologies and engineering excellence to bring the highest quality products to our clients. By leveraging our leading

Wison Engineering is a leading provider of EPC services

and integrated technology solutions for the energy and

chemical industries. Established in 1997 and listed on the

construction, and project management. Wison operates

system to deliver outstanding, safe, and comprehensive

under an internationally recognized HSE management

engineering services to clients worldwide.

Hong Kong Stock Exchange (stock code: 02236.HK) in

position in engineering digitalization and modularization, we are dedicated to offering the most cost-effective solutions for energy and chemical industries.
